

## ALUMINUM ANCHOR PLATE

### USE (cf. instructions sheet)

The VECTASAFE aluminum anchor plate is an anchor point allowing securing one or two users maximum.

It allows the installers equipped with a PPE (Personal Protective Equipment) to secure their moves during works at height, maintenance works and cleaning works.

### ADVANTAGES

- > Fixing on horizontal or vertical surfaces
- > Use as part of suspended works
- > Quick installation
- > Resistance higher than the one required by the **EN 795: 2012 type A** European standard

### TECHNICAL CHARACTERISTICS

- **Material** : moulded aluminum alloy
- **Processing** : Delivered painted in RAL 7016 (anthracite grey) original. Other RAL colors on request: 

- **Weight** : 0,28 kg
- **Not deformable**
- **Resistance** : 13 kN
- **Field of application** : indoor or outdoor
- **Standard** : norm EN 795 : 2012 type A  
technical specifications TS 16415 : 2013
